Profile

Motivated second year B.Sc. (Hons.) in Artificial Intelligence undergraduate at the University of Moratuwa with a strong interest in machine learning, deep learning, and applied AI. Skilled in building and fine tuning machine learning models, working with large language models and AI agents, and developing full stack applications. Passionate about turning data into practical solutions, learning new tools quickly, and building AI products that solve real problems. A dedicated and fast learner with good teamwork, communication, analytical, and problem solving skills.

Education

B.Sc. (Hons.) in Artificial Intelligence

University of Moratuwa

2024–Present

Moratuwa, Sri Lanka

- CGPA: 3.57 / 4.00

G.C.E. Advanced Level Examination

S. Thomas' College Bandarawela

2011–2023

Bandarawela, Sri Lanka

- Badulla Non Stream District Rank: 2nd | Z-Score: 1.9214 (Combined Mathematics: A, Physics: B, ICT: A)

Skills

- AI, Machine Learning & LLM Engineering:** PyTorch, TensorFlow, Scikit-learn, Transformers, Hugging Face, LangChain, LangGraph, RAG, SHAP, XGBoost, LightGBM, DistilBERT and Groq API
- Data Science & Visualization:** NumPy, Pandas, Matplotlib, Seaborn and Jupyter Notebook
- Programming Languages:** Python, R, Java, JavaScript, TypeScript, C, C++, PHP and Prolog
- Frameworks & APIs:** FastAPI, Node.js, Express.js, React.js, Next.js and Tailwind CSS
- Databases & Cloud:** PostgreSQL, MySQL, Supabase, Firebase, AWS EC2, Vercel and Render
- Developer Tools:** Git, GitHub, Postman, Thunder Client, Cisco Packet Tracer and Figma
- Design & Soft Skills:** Photoshop, Lightroom, Leadership, Project Management, Communication, Teamwork, Analytical Thinking and Problem Solving

Key Projects

PredictiX [GitHub](#) [Demo](#)

Second Year Industry Based AI Software Project | Ongoing

AI Predictive Maintenance Platform

Tech Stack: Python, FastAPI, Next.js, TypeScript, PostgreSQL, Supabase, AWS EC2, Vercel, XGBoost, LightGBM, DistilBERT, LangChain, Groq and SHAP

- Engineered an AI predictive maintenance platform for warehouse vehicle fleets with failure prediction, maintenance forecasting, cost estimation, survival analysis and asset intelligence modules.
- Built machine learning models using XGBoost and LightGBM for failure prediction and maintenance forecasting, with SHAP explanations for model transparency.
- Developed a Weibull survival model using Lifelines to estimate component survival probabilities and remaining useful life.
- Fine tuned DistilBERT models for ticket categorization, ticket summarization and asset summarization.
- Built RAG pipelines using LangChain and Groq Llama 3.3 for AI generated warehouse reports, asset reports and a role based chatbot.
- Developed and deployed the system using a Next.js and TypeScript frontend on Vercel, a FastAPI backend on AWS EC2 and PostgreSQL through Supabase.

Research Assistant [GitHub](#)

Individual Project

Multi Agent Research Assistant

Tech Stack: Python, LangChain, OpenAI, Pydantic, Streamlit and DOCX

- Built a multi agent research assistant in which three LLM agents research a topic, fact check claims and generate a structured report.
- Used LangChain and Pydantic schemas to create reliable, structured handoffs between the agents.

- Added web search as a callable tool and implemented one click DOCX report generation through a Streamlit interface.

CV Mate [GitHub](#) [Demo](#)

Individual Project

AI Resume Builder

Tech Stack: React, Vite, Firebase, Gemini API, Electron, PDF, DOCX and JSON

- Built a browser based CV builder with live preview, ATS scoring and keyword gap detection.
- Integrated Gemini API for profile summary generation, bullet point rewriting and job description matching.
- Added Firebase cloud synchronization and export support for PDF, DOCX and JSON formats.
- Developed an Electron desktop version of the application.

ReClaim [GitHub](#) [Demo](#)

Individual Project | Ongoing

Smart Lost and Found Platform

Tech Stack: Next.js, Node.js, Express.js, PostgreSQL, Prisma, OpenAI Embeddings, Socket.io, Cloudinary and JWT

- Developed a smart lost and found platform that matches lost and found reports using category, keywords, GPS, date and semantic similarity.
- Integrated OpenAI embeddings to improve item matching beyond conventional keyword based methods.
- Implemented JWT authentication, real time chat using Socket.io, Cloudinary image uploads and an administrative dashboard.
- Deployed the frontend on Vercel and the backend services on Render.

SmartFlow [GitHub](#)

First Year Hardware Project

Smart People Tracking Fan

Tech Stack: ESP32, ESPHome, HLK-LD2450 mmWave Radar, DHT22, Servo Motor, AC Dimmer and OLED

- Built an ESP32 based smart fan that detects people using an mmWave radar sensor and rotates a servo to follow their position.
- Enabled tracking of up to three targets using their X and Y coordinates.
- Read room temperature and humidity using a DHT22 sensor and adjusted fan speed through an AC dimmer.
- Added physical button controls, an OLED display and remote Wi-Fi monitoring using ESPHome.

Achievements

- **Finalist, DataXplore 2.0** | Data Science Competition organized by the University of Sri Jayewardenepura
- **Best G.C.E. Advanced Level Results, Common Stream** | S. Thomas' College Bandarawela
- **Best Pillar Member of the Term 2024/25, Photography Pillar** | MoraSpirit, University of Moratuwa

Online Courses & Certifications

- Machine Learning Specialization | DeepLearning.AI
- Introduction to Cybersecurity | Cisco
- Python Programming and Frontend Web Development | University of Moratuwa
- Intermediate Machine Learning and Time Series | Kaggle
- Python and Data Science | University of Colombo

Volunteering and Extra Curricular Activities

Head of Photography Pillar	2024–Present
MoraSpirit, University of Moratuwa	
Web Developer	2025–Present
IoT and Embedded Systems Research Labs, Faculty of Information Technology, University of Moratuwa	
Web Developer, Member	2024–Present
Mora Hiking Club, University of Moratuwa	
Assistant Head of Photography and Videography Pillar	2024–Present
FIT Moments, Faculty of Information Technology, University of Moratuwa
